

To whom it may concern,

I have been a local K-Love listener and supporter since approximately 1992. K-Love is a family friendly, uplifting radio station unlike any other on the airwaves. If K-Love loses it's translator in my area (or other areas I drive through) I could be left without any K-Love signal. This station serves many listeners, ones who support monetarily and even ones who just "happen" to find the station while flipping through stations. Since K-Love can be heard world wide it makes us feel connected to people all around the world even though we haven't left our own communities.

This station educates me and my children through it's news and biblical commentaries. It is safe for my children to listen to unlike many stations out there. The programming encourages christian behavior which can in turn positively effect every local community within it's range. As Christians we are called to serve others and help those in need, not just other Christians but any local community member in need. Obviously this has a huge positive effect on communities who are always in need of volunteers to help run the volunteer programs of their cities.
